

## **CFS/ME Expert Group Terms of Reference**

---

### **Terms of Reference**

1. To consider and review the status of current research in CFS/ME.
2. To consider the underlying mechanisms and sub-phenotypes of CFS/ME.
3. To identify research opportunities incorporating new technologies and conjoint areas and encourage new research towards understanding the basis of CFS/ME.
4. To produce a framework for conducting high quality CFS/ME research in the future.
5. To work to achieve clear lines of communication and synergy between all stakeholders with an interest in this area.
